SUMMARY

Product Designer with 5+ years of experience in end-to-end Product Design, leading 0→1 initiatives from discovery to delivery across fintech, healthtech, and Web3. Specialized in transforming complex products and Data Products into simple, scalable, and impact-driven experiences. Expertise in UX/UI, Design Systems, prototyping, and experimentation, with AI-powered workflows. Experience working in multidisciplinary and global teams, connecting design, product, engineering, and business. Projects adopted by Kraken and Worldchain, presented at Devcon (Ethereum), and awarded at global hackathons.

SKILLS

Product Strategy · End-to-End Product Design · UX/UI Design · Design Systems · User Research · Product Discovery · Interaction Design · Information Architecture · Wireframing & Prototyping · Usability Testing · Data-Driven Design · Experimentation (A/B Testing) · Growth & Activation · Cross-functional Collaboration · Stakeholder Management · Agile (Scrum/Kanban) · Handoff to Engineering · Accessibility (WCAG) · AI-Assisted Design · Prompt Engineering · LLM Interaction Patterns · Web3 UX · DeFi Interfaces · Fintech · Data Platforms · B2B & B2C SaaS · High-Density Data Interfaces · Visual Direction

TOOLS: Figma · FigJam · Miro · Photoshop · Illustrator · Blender · Cursor · ChatGPT · Claude · Midjourney · GitHub · Jira · ClickUp · Slack

WORK EXPERIENCE

Senior Product Designer – Brand & UX — *Hedgehog Protocol*

Oct 24 – Mai 26

- Led the end-to-end design of 3 product launches (0 → 1), conducting UX research, journey definition, prototyping, usability testing, and handoff to engineering.
- Designed and optimized acquisition and activation funnels, building a waitlist landing page with a 37.5% conversion rate, generating 15,000+ qualified users from a 40K+ organic audience (zero paid media).
- Structured the Design function and built the Design System from scratch, with 120+ components in Figma, using Auto Layout, tokens, and scalable patterns, reducing handoff time and inconsistencies between design and engineering by ~35%.
- Simplified complex on-chain trading flows (betting, position tracking, and settlement), translating technical business rules into intuitive experiences, increasing usability for users with no prior Web3 experience.
- Defined UX guidelines and product strategy for growth, onboarding, and activation loops, contributing to product-market fit validation in a highly competitive environment (DeFi/Web3).
- Accelerated discovery and validation cycles through rapid prototyping and AI-assisted workflows via CursorAI, reducing experimentation time and increasing testing throughput.
- Worked cross-functionally with founders, engineering, and technical stakeholders, influencing roadmap, prioritization, and product decisions.

Brand Designer – (Part-time Contract) — *Picnic*

Oct 25 – Dec 25

- Defined a cohesive brand and product design system covering colors, typography, iconography, and component tokens, establishing a scalable visual language adopted across all product surfaces.
- Delivered the UI foundations and key visual marketing materials that strengthened the product identity and enabled the go-to-market launch within a 12-week timeline.

Independent Product Designer – (Personal Projects & Hackathons)

Jan 24 – Oct 24

- Delivered 6+ product design projects in fast-paced hackathon environments, taking ideas from concept to functional prototype within 48–72 hours.
- Selected for Superfluid Guild 2; project highlighted in the program, receiving a funding grant and an invitation to present at Devcon Thailand, a leading international Web3 conference.

- Applied design thinking and user journey mapping to validate problem-solution fit before each build, reducing the post-hackathon pivot rate.

Iron-Health Within Your Reach - May 2021 – Dec 2023

Mid Product Designer – Discovery & Bundles • Nov 2022 – Dec 2023

- Conducted user interviews and usability testing with patients and healthcare professionals, translating findings into 3 major flow improvements that increased the appointment completion rate by 80%.
- Created a curated portfolio of researched and validated product bundles designed to meet end-customer needs and offered as white-label solutions to major self-managed healthcare organizations in Brazil.

Junior UX/UI Designer – Platform • May 2021 – Nov 2022

- Designed responsive digital health interfaces during the peak of COVID-19, supporting 90,000+ patient interactions per month with improvements to accessibility and usability across teleconsultation flows.
- Structured critical remote consultation flows (scheduling, triage, video calls, and follow-up), reducing patient journey friction from 7 to 3 steps.

PROJECTS

Product Designer & Data UX — *Transparent.space*

Nov 25 – Apr 26

- Designed the end-to-end experience of a data platform for liquidity providers, from discovery through product validation.
- Led high-density data dashboards, reducing analysis time from ~20 minutes to under 30 seconds, according to B2B users.
- Increased task success rate from 61% to 88% through multiple cycles of usability testing and data-driven iteration.
- Accelerated design cycles by ~60% through AI-assisted prototyping and workflows using CursorAI.
- Contributed to product-market fit validation in a highly technical environment (Web3/Data Platforms).
- Delivered data products used by leading Web3 players, including Worldchain and Kraken.

Superfluid Grant + Devcon Thailand 2024 — *Web3 Product Innovation*

Jul 24 – Nov 24

- Selected and funded by the **Superfluid Guild 2** program, with an invitation to present the project at **Devcon Thailand 2024**, the leading global Ethereum conference.
- Developed an end-to-end Web3 product focused on making on-chain interactions more accessible to non-technical users.
- Recognized for UX innovation in blockchain, with a focus on simplifying complex workflows.
- Presented the project internationally, validating the concept with the global community of developers and builders.

RECOGNITION & AWARDS

1st Place — ETHSamba 2023 (ETH Track)

Transformed complex on-chain mechanics into an accessible and structured experience for Headhunters.

1st Place — BlockchainRio 2024 (Ripio Track)

End-to-end product design focused on reducing friction for non-technical users.

2nd Place — BlockchainRio 2025 (BASE Track)

End-to-end product design focused on making the first crypto investment via Pix easier.

EDUCATION

Associate's Degree ,International Business and Foreign Trade — Anhanguera Educational

Associate's Degree, Develop and Analytics System — Anhanguera Educational

CERTIFICATION

DesignBoost, 2024–Present

cfPRO, 2024

UI Boost, 2023

UX Unicórnio, 2022

LANGUAGE

English: Professional Proficiency (C1)

Spanish: Intermediate (B1)
